Planning for an Animation Project

As a teacher, you are always thinking ahead. An animation project is no different, and requires the same careful pre-planning to make sure you cover all the important bases.

Preparation Activities

How will you get your students ready? What will you show them? How will they plan? How will you show them how to use the software?

Technology in my School

What equipment do I have at my disposal? What kind of setup do we have: lab, classroom, portable lab-pack? Is the necessary software installed? Who can I get to help me?

My Idea

Our class project will be:

Curriculum Links

What subjects will this project encompass? What subject content will be covered? What competencies will be developed?

Timeline

When in the school year could I do this project? How long will this take? Work backwards to estimate a timeline.
